ABOUT ME:

I am a frontend web developer who finds digital technology endearing. I like to create things, take on extremely tasking challenges and I like to learn.

I am seeking the position of a web developer in a thriving or growing company where I can experience the thrill of bringing life to ideas, creating what was believed unimaginable, working with excellent developers amidst executing my tasks, learning and evolving.

I am well skilled in HTML5, CSS3/BOOTSTRAP and JAVASCRIPT. I look forward to using these skills to develop web-based events, Software tools and being of inestimable value to your team/company.

EDUCATION:

B.A History and International Studies (2017-2021)
